

PermaPro Concrete Remover

PRODUCT DESCRIPTION :

PermaPro Concrete Remover is a concrete de-bonding agent that reverses the molecular bonding action of cement and turns it back into a loose mix of sand and aggregate that is easily rinsed away. PermaPro Concrete Remover is used to remove concrete trucks, mixers, tools, forms, saws and finishing machines, etc. without high labor costs and damaging hammer and chisel work .

HOW TO USE:

Use PermaPro Concrete Remover full strength, do not dilute. Do not wet down concrete before applying. Do not apply to extremely hot surfaces.

Spray on PermaPro Concrete Remover to thoroughly wet and saturate the concrete. Allow it to penetrate and soften the concrete. For heavy deposits, apply several sprays of PermaPro Concrete Remover. Do not let it dry. Continue spraying and let it work for 20-30 minutes or until concrete is softened and can be removed easily by water.

For cleaning tools and parts, pour enough PermaPro Concrete Remover in a plastic bucket to cover the tools entirely. Soak tools until concrete is loosened. Wash with water and dry.

BENEFITS:

- No harsh mineral acids . PermaPro Concrete Remover is strong but gentle. It does not depend on muratic acid to dissolve the concrete slowly from the top down with corrosive fumes.
- PermaPro Concrete Remover has no volatile mineral acids, it does not evaporate or loose strength rapidly. It keeps on working until the entire mass of concrete is broken down and can be flushed off easily.
- Safe : PermaPro Concrete Remover is not corrosive to the skin and has no corrosive fumes to attack the lungs. It does not attack steel or aluminum.

PROPERTIES and STORAGE :

Type : Complexing concrete cleaner, remover.

Color : Pale yellow

Ph : 1,5—2,5

Odor : Nil

Flammability : Nonflammable

Storage : One year in original packaging if kept above freezing.

Packaging : 5 liters.

WARNING :

Irritant to eyes. Avoid lengthy or repeated skin contact. Gloves and protective clothing are always recommended for maximum protection.
