

# PermaPro Cure and Seal

---

## PRESENTATION :

PermaPro Cure and Seal forms a sealing, curing membrane coating that hardens and dust proofs freshly laid concrete in one simple, economical operation.

PermaPro Cure and Seal contains no chlorinated or fluorinated solvents or other ozone depleting solvents.

PermaPro Cure and Seal is applied to freshly laid concrete surfaces as soon as the surface finishing operations are completed in order to suppress the evaporation of water from the concrete.

---

## HOW TO USE :

The preferred method of application is to use a solvent resistant pump up sprayer, and spray a thin uniform coat of PermaPro Cure and seal over the entire surface of the concrete as soon as it is finished and all surface water is absorbed.

Do not spray over puddled water.

---

## BENEFITS:

- Controls moisture loss : Rapid loss of moisture in the surface of freshly laid concrete prevents proper curing and leads to weak flaking surface. PermaPro Cure and Seal seals and prevents rapid moisture loss thus producing stronger and harder concrete.
  - Reduces dusting : PermaPro Cure and Seal film binds to the dry surface of the concrete and reduces incidental dusting.
  - Helps prevent staining : The sealed surface prevents water based stains from penetrating the surface and reduces clean up problems
  - Prevents checkering : By controlling the moisture loss, rapid cure is prevented. Rapid cure leads to surface stress and this leads to spider web cracking.
- 

## PROPERTIES and STORAGE :

Type : Acrylic polymer curing coating.

Color : Colorless and clear.

Odor : Solvent

Flammability : Flammable

Storage : Can be stored in the original bottle for up to one year with no loss of activity. Do not store near open flames, sparks or equipment that may create sparks.

Packaging : 25 liters

Coverage : 1 liter = 10 m<sup>2</sup>

---

## WARNING :

Avoid prolonged or repeated skin contact. Gloves and protective clothing are always recommended for maximum protection.

Flammable : Do not use, pour or store near open flames, sparks or equipment that may create sparks.

ONLY FOR PROFESSIONAL

The information given herein is the result of our studies and product experience. Because of the diverse possibilities of usage of this product. the different ways the product can be applied and the subjective characteristics. this information is given for informational purposes only and cannot be considered a legal argument.
